Ontario Politics: Week 1

Today, INNOVATIVE is releasing results from the first wave of our election tracking survey.

This online survey was in field from May 5th to 9th, 2022 with a weighted sample size of 700. Detailed methodology is provided in the appendix.

**Read, Seen,
Heard**

Measuring Campaign Impacts

Each campaign hopes to win over voters first by their ability to capture their attention and second by what those voters hear about them.

INNOVATIVE tracks the impact of each campaign by asking Ontarians whether they have heard about each party recently, what they have heard, and whether it has had a positive or negative impact on their impressions of that party.

Each respondent is asked whether they have read, seen, or heard something in the last 7 days about the Liberals, the Progressive Conservatives and the New Democrats.

For each party that a respondent has heard about, they are asked what they heard and whether that news had a positive or negative impact on their impression of that party.

Campaign Attention: Attention to the PC campaign is the highest, with 46% saying they have heard something about Doug Ford and the PCs

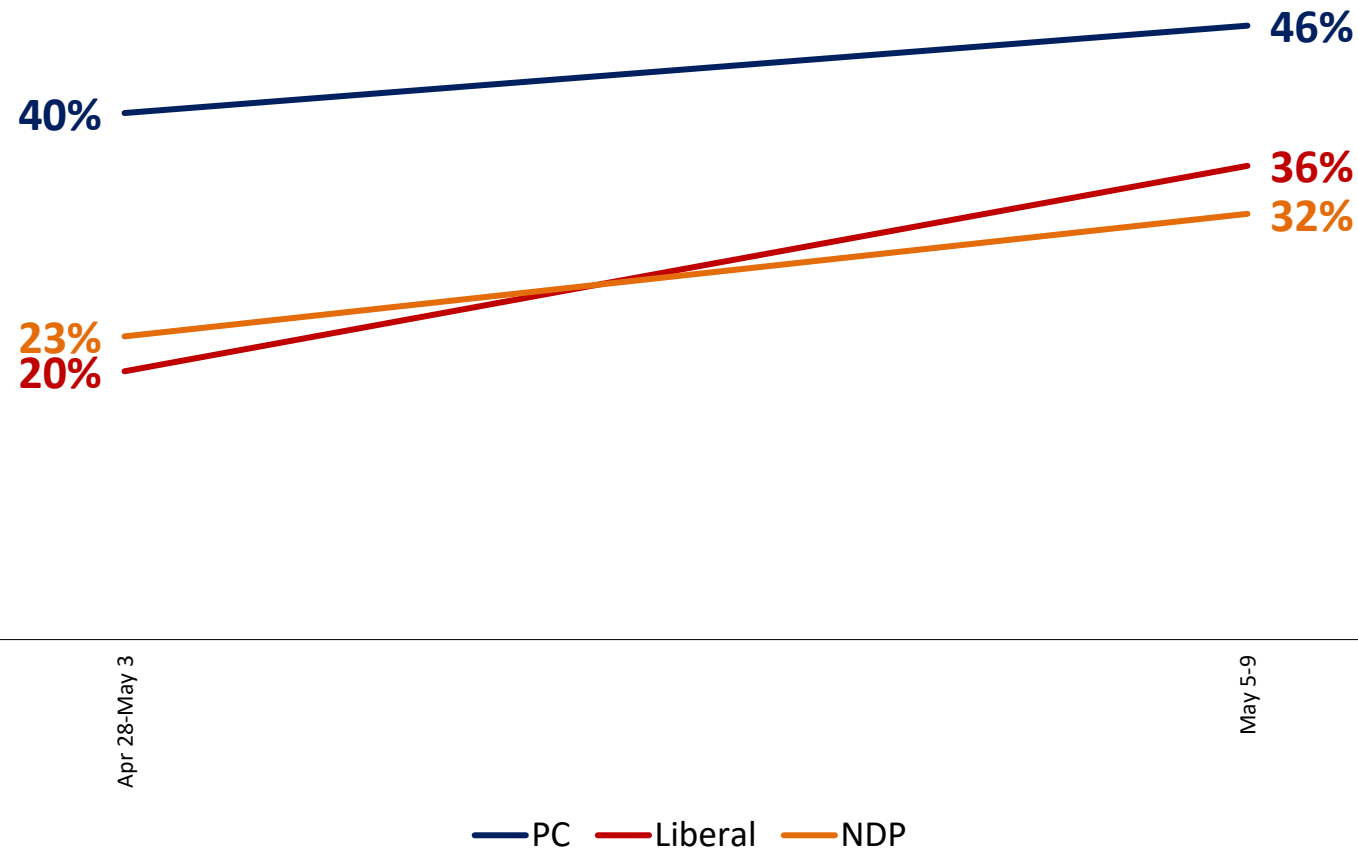

Q Have you read, seen or heard anything about [PARTY] in the last few days?
[asked of all respondents; n=700]

Read, Seen, Heard Tracking: Attention is up since last week but a majority continue to not have heard of each campaign

Q

Have you read, seen or heard anything about [PARTY] in the last few days? Showing % who have read, seen, or heard about each party.

Campaign Impact: The impact of the recent campaigning is most favourable for the NDP, less favourable for the PCs

Did what you read, see or hear leave you feeling a lot more favourable, somewhat more favourable, somewhat less favourable or a lot less favourable towards [PARTY], or did it make no difference?

[asked of all respondents who had read, seen or heard about the party]

RSH PCs: One-in-three (35%) of Ontarians who heard about Doug Ford heard about highways being built; the net impact was negative

And what did you read, see, or hear about Doug Ford and the Progressive Conservative party? [OPEN END]
[asked only of those who RSH about Doug Ford and the Progressive Conservative; n=325]

Note: 'No response' (<1%) not shown

PC Impact by Partisanship: The net impact of recent news is only positive for the PCs among their own partisans

Did what you read, see or hear leave you feeling a lot more favourable, somewhat more favourable, somewhat less favourable or a lot less favourable towards the Progressive Conservative Party, or did it make no difference?

[asked of all respondents who had read, seen or heard about the party]

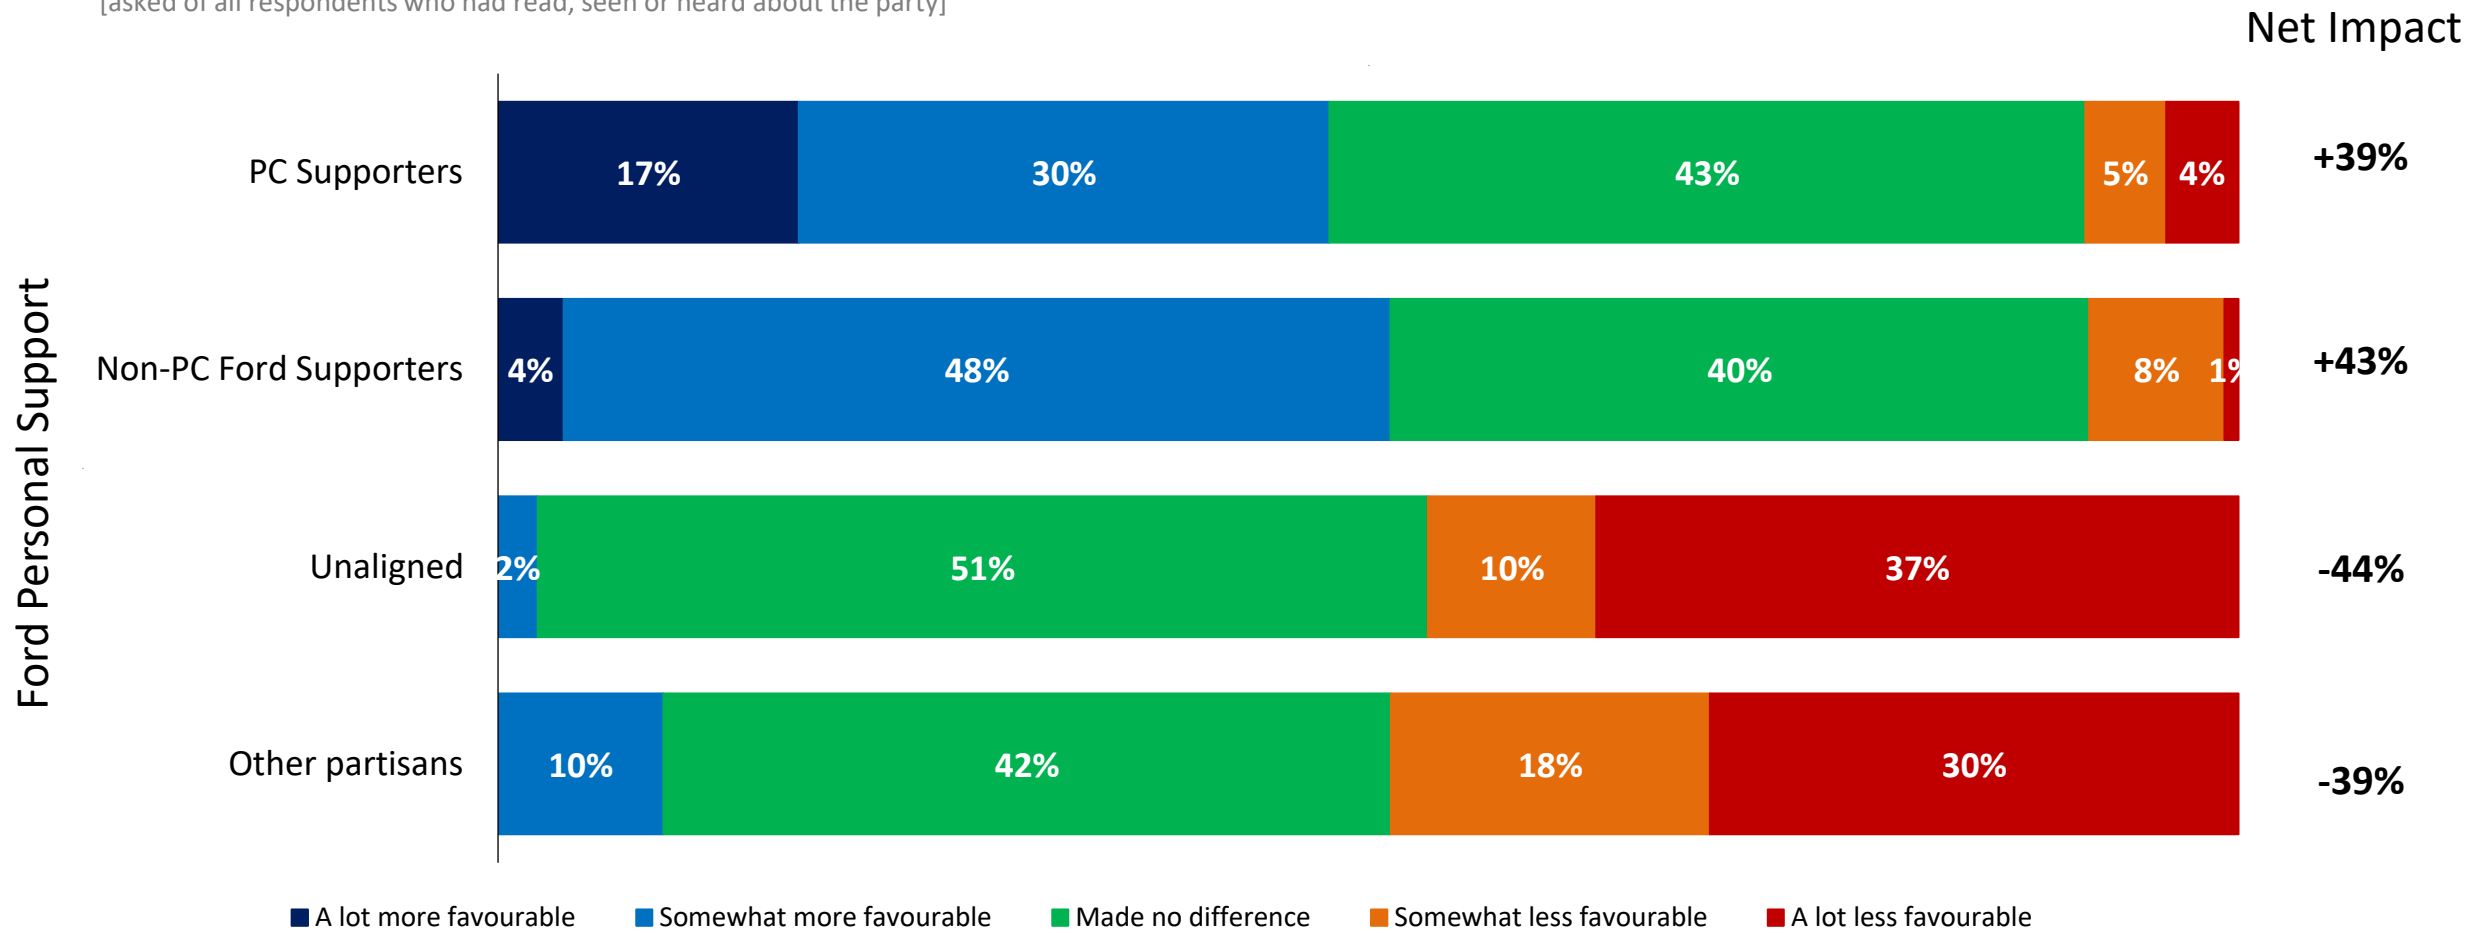

PC Impact by Partisanship: Recent news has helped the PCs among their supporters and among non-PC Ford supporters

Did what you read, see or hear leave you feeling a lot more favourable, somewhat more favourable, somewhat less favourable or a lot less favourable towards the Progressive Conservative Party, or did it make no difference?

[asked of all respondents who had read, seen or heard about the party]

RSH Liberals: A plurality heard about the Liberal Buck-a-Ride plan; the impact was positive

And what did you read, see, or hear about Steven Del Duca and the Ontario Liberal party? [OPEN END]

[asked only of those who RSH about Steven Del Duca and the Ontario Liberal party; n=251]

Note: 'No response' (<1%) not shown

Liberal Impact by Partisanship: The impact is strongly positive among both Liberals and New Democrats

Did what you read, see or hear leave you feeling a lot more favourable, somewhat more favourable, somewhat less favourable or a lot less favourable towards the Ontario Liberal Party, or did it make no difference?

[asked of all respondents who had read, seen or heard about the party]

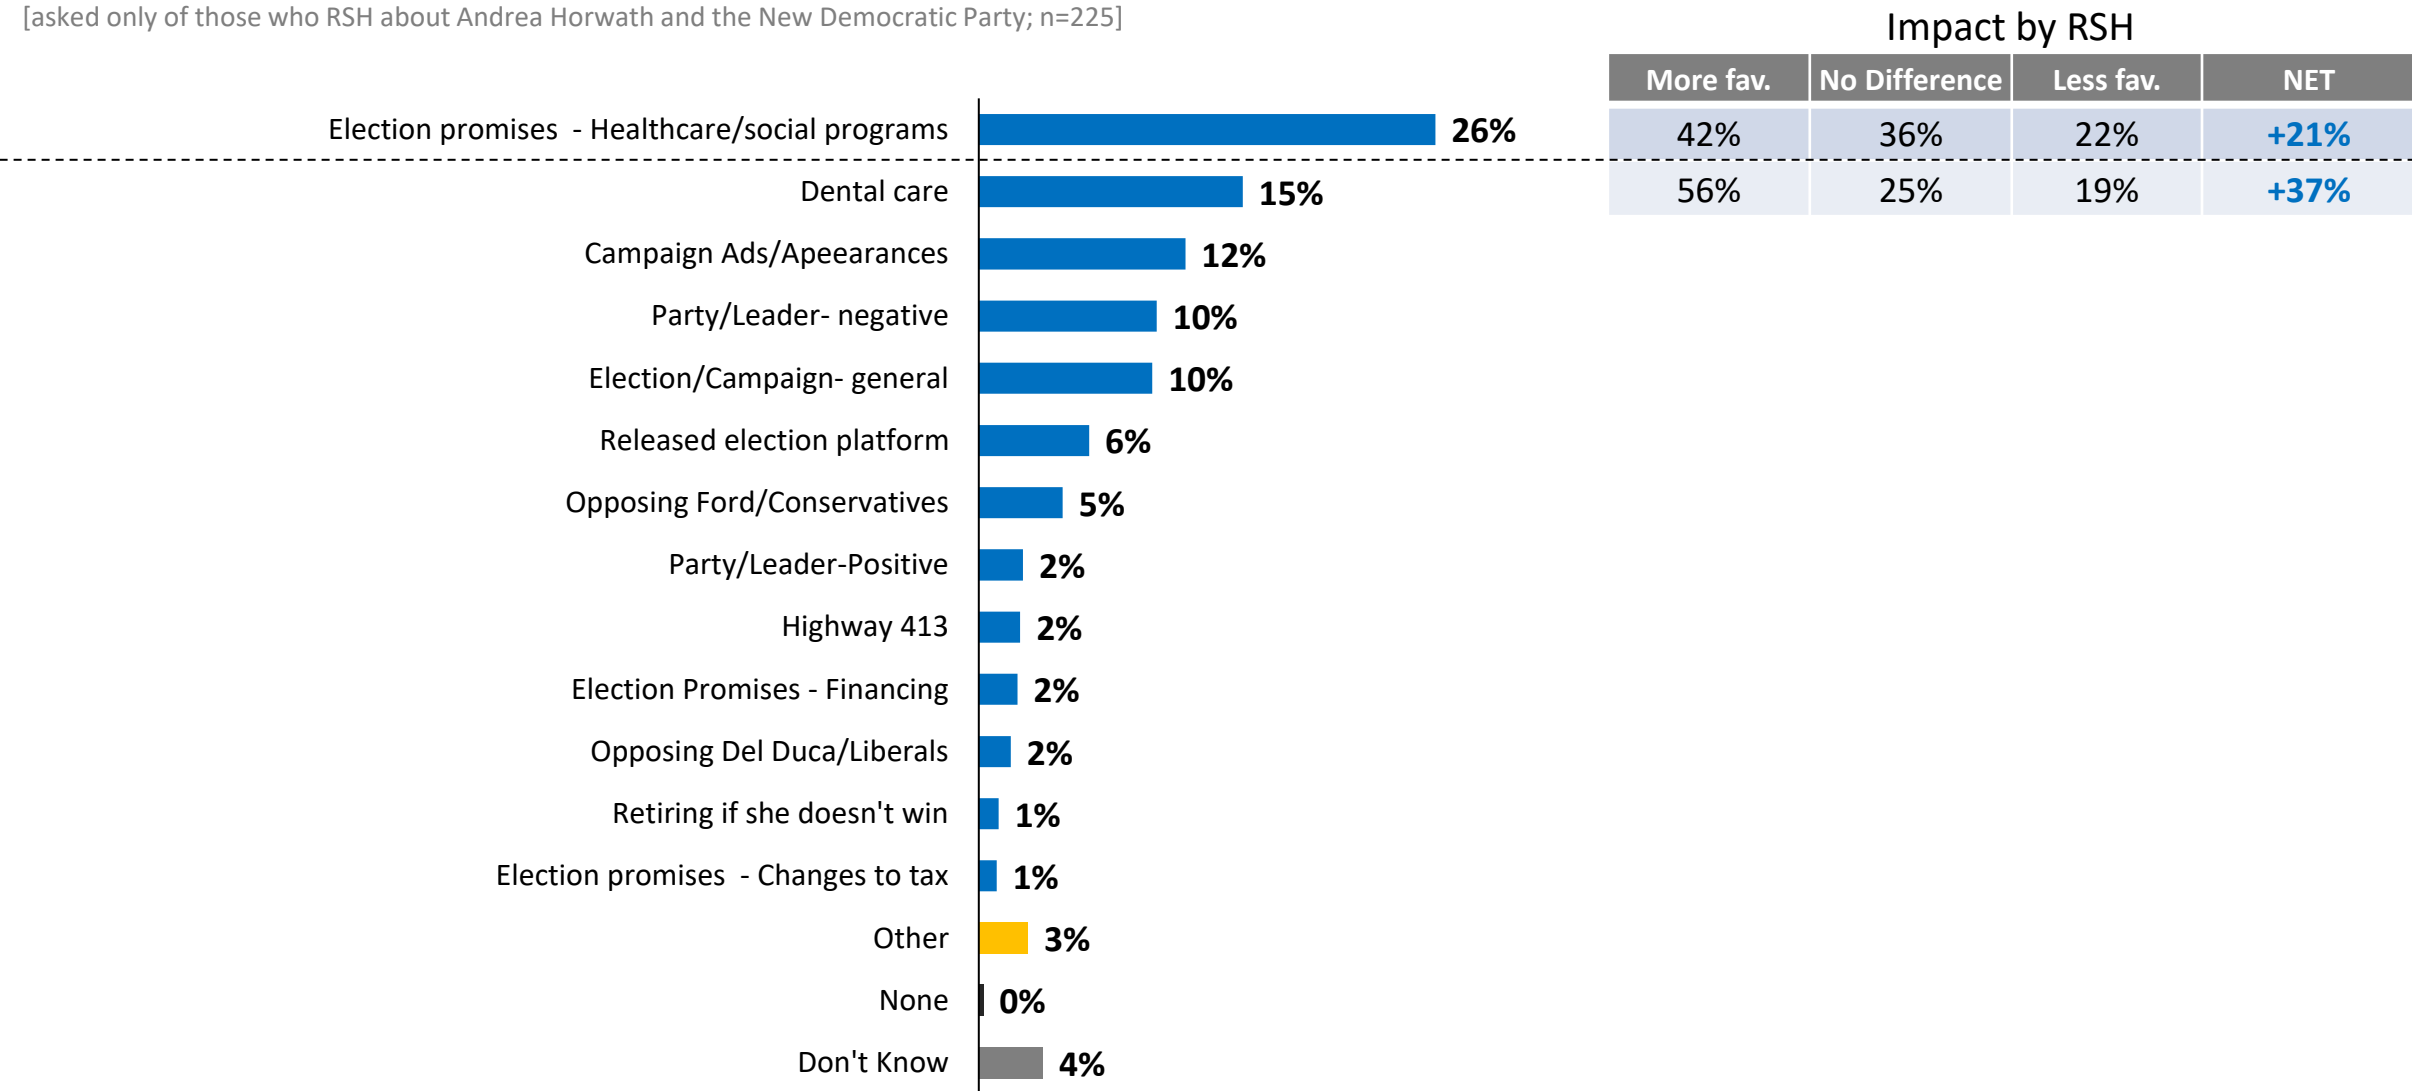

Note: * indicates a small sample size (N<30); treat results with caution.

RSH New Democrats: Promises for healthcare and social programs, as well as dental care have a positive impact

And what did you read, see, or hear about Andrea Horwath and the New Democratic Party? [OPEN END]

[asked only of those who RSH about Andrea Horwath and the New Democratic Party; n=225]

Note: 'No response' (<1%) not shown

NDP Impact by Partisanship: The net impact of recent news is positive among Liberal, NDP, and other partisans

Did what you read, see or hear leave you feeling a lot more favourable, somewhat more favourable, somewhat less favourable or a lot less favourable towards the New Democratic Party, or did it make no difference?

[asked of all respondents who had read, seen or heard about the party]

Note: * indicates a small sample size (N<30); treat results with caution.

Positive Impact Tracking: Positive impacts are up directionally for the NDP since last week to 34%

Segments

Key Segmentations

Throughout the campaign, INNOVATIVE will use four key segmentations to understand movement in vote intention and leader reputation. These segmentations have been developed, refined, and validated over the course of dozens of elections campaigns that we have tracked. Detailed definitions and results for each segment can be found in the appendix.

Political Value Clusters

We group Ontarians into six “values” clusters based on 4 key political values:

1. Populist Conservatives (11%)
2. Deferential Conservatives (10%)
3. Business Liberals (22%)
4. Left Liberals (18%)
5. Core Left (17%)
6. Thrifty Moderates (23%)

Economic Gap

The economic gap segmentation divides Ontarians by their outlook on their economic future, splitting them into four groups:

1. Canadian Dream Achievers (28%)
2. Canadian Dream Strugglers (25%)
3. Ambivalent (23%)
4. Alienated (23%)

Time For Change

This segmentation separates Ontarians by their views on the incumbent government. Is it time for a change, and is there a better alternative than the current government? This creates six groups:

1. Core PCs (17%)
2. Soft PCs (10%)
3. Time for Change PCs (14%)
4. Uncertain (12%)
5. Soft anti-PCs (26%)
6. Hostile (21%)

Ford Personal Support

This segmentation separates by their partisanship and views of Doug Ford to find voters who support Ford personally but do not identify as Progressive Conservatives. This creates four groups:

1. Core PCs (26%)
2. Ford Personal Supporters (20%)
3. Unaligned (17%)
4. Other supporters (37%)

Provincial Vote

Likelihood to Vote: 2-in-3 (64%) of respondents say that they will definitely vote in the provincial election

Appendix: Methodology

Survey Methodology

These are the results of an online survey conducted between May 5th and May 9th, 2022.

Method: This online survey was conducted using INNOVATIVE's Canada 20/20 national research panel with additional respondents from Dynata, a leading provider of online sample. Each survey is administered to a series of randomly selected samples from the panel and weighted to ensure that the overall sample's composition reflects that of the actual Ontario population according to Census data to provide results that are intended to approximate a probability sample. More details about Dynata can be found [here](#).

Sample Size: n=796 Ontario residents, 18 years or older. The results are weighted to n=700 based on Census data from Statistics Canada.

Field Dates: May 5th to May 9th, 2022.

Weighting: Results for Ontario are weighted by age, gender, and region to ensure that the overall sample's composition reflects that of the actual population according to Census data; in order to provide results that are intended to approximate a probability sample. Results are additionally weighted by party ID to match a six-month rolling average from live caller telephone surveys (both landline and cellphone). Weighted and unweighted frequencies are reported in the table. The design effect from this weighting procedure is 1.20. The design effect is an estimate of the effect of the weighting procedure on the sampling error.

Margin of Error: This is a representative sample. However, since the online survey was not a random probability based sample, a margin of error cannot be calculated. Statements about margins of sampling error or population estimates do not apply to most online panels.

Full disclosure standards can be found [here](#).

Note: Graphs may not always total 100% due to rounding values rather than any error in data. Sums are added before rounding numbers.
