the Palestinians.

# 1

**Most agree it is both important for Israel to exist as a Jewish state and to create a state for the Palestinians** While most respondents reported feeling somewhere in the middle "Don't know/Feel split" between taking Israel's and the Palestinians' side, there's strong agreement for the idea that it is both important for Israel to exist as a Jewish state (52%), and to create a state for the Palestinians (49%). Looking further at subgroups, among respondents who report mostly/always agreeing with the Palestinians' views, 43% still agree that it's important for Israel to exist as a Jewish state. Among those who mostly/always take Israel's view, 42% agreed it was important to create a state for

#### Canadians are largely in agreement about what types of speech on Israel/Palestine should be allowed

Canadians as a whole feel very similarly about speech supporting/opposing either state. A majority say that speech supporting either state *should be allowed*, and a plurality feel the same about speech opposing either state. What's more, Canadians as a whole are in agreement that speech calling for violence or saying that either group are a threat to Canadian society *should not be allowed*.

#### Supporters of Israel and the Palestinians respect speech rights of each other

Fifty-percent (50%) of respondents who said they take Israel's view believe that speech opposing Israel's right to exist as a Jewish state *should* be allowed, and 53% of those taking the Palestinians' view feel the same about speech opposing a Palestinian state. Similarly, 62% of those taking the Palestinians' view report thinking that speech supporting Israel's right to exist as a Jewish state *should* be allowed, and 63% of respondents who take Israel's view think the same about speech supporting a Palestinian state.

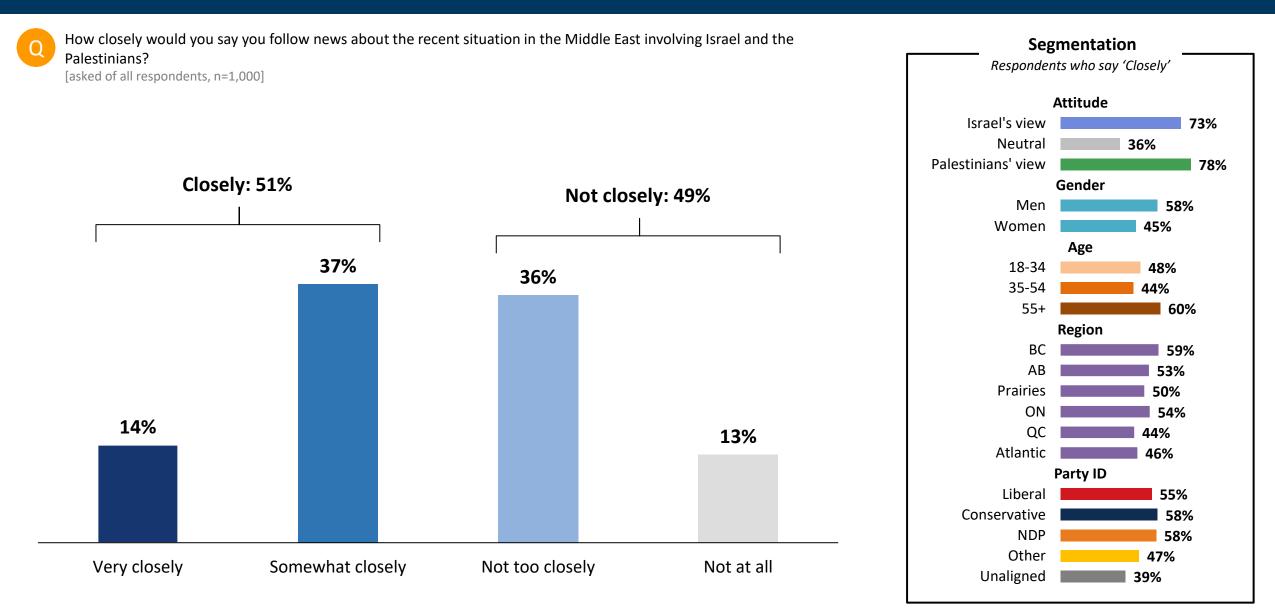

# 4

#### When it comes to protests, only "marches in cities" garnered net positive support

Overall, support for pro-Israeli and pro-Palestinian protest actions were roughly similar. And the only protest action that received net positive support for either pro-Israeli or pro-Palestinian protests was "marches by supporters in Canada's major cities", +7% and +11% respectively.

# Methodologies

# **2024 Survey Methodology**

# These are the results of an online survey conducted between May 16<sup>th</sup> and May 28<sup>th</sup>, 2024.

**Method:** This online survey was conducted using INNOVATIVE's Canada 20/20 national research panel with additional respondents from Lucid, a leading provider of online samples. Each survey is administered to a series of randomly selected samples from the panel and weighted to ensure that the overall sample's composition reflects that of the actual Canadian population according to Census data to provide results that are intended to approximate a probability sample.

**Sample Size:** n=1,872 Canadian citizens, 18 years or older. The results are nationally weighted to n=1,000 based on Census data from Statistics Canada.

**Field Dates:** May 16<sup>th</sup> and May 28<sup>th</sup>, 2024.

**Weighting:** Results for Canada are weighted by age, gender, region, education, and self-reported federal past vote to ensure that the overall sample's composition reflects that of the actual population according to Census data, in order to provide results that are intended to approximate a probability sample. Weighted and unweighted frequencies are reported in the table.

**Margin of Error:** This is a representative sample. However, since the online survey was not a random probability-based sample, a margin of error cannot be calculated. Statements about margins of sampling error or population estimates do not apply to most online panels.

**Note**: Graphs may not always total 100% due to rounding values rather than any error in data. Sums are added before rounding numbers.

# These are the results of an online survey conducted between February 4<sup>th</sup> and February 14<sup>th</sup>, 2022.

**Method:** This online survey was conducted using INNOVATIVE's Canada 20/20 national research panel with additional respondents from Dynata, a leading provider of online samples. Each survey is administered to a series of randomly selected samples from the panel and weighted to ensure that the overall sample's composition reflects that of the actual Canadian population according to Census data to provide results that are intended to approximate a probability sample.

**Sample Size:** n=1,598 Canadian citizens, 18 years or older. The results are nationally weighted to n=1,000 based on Census data from Statistics Canada.

Field Dates: February 4<sup>th</sup> and February 14<sup>th</sup>, 2024.

**Weighting:** Results for Canada are weighted by age, gender, region, and party identification to ensure that the overall sample's composition reflects that of the actual population according to Census data, in order to provide results that are intended to approximate a probability sample.
