# Summary

- 1** Following the Federal Liberal leadership debate, the gap between Liberals and CPC continues to narrow. Conservatives lead by 6 points in combined vote, their smallest lead since September 2023.
- 2** Conservative strongholds remain in AB and BC with 40% and 47% of the combined vote, respectively. This week, the Liberals trail the CPC in all regions except Quebec, where they lead with 28%.
- 3** Poilievre and the CPC's net favourability continue to decline, now at -9%. In comparison, Carney's net favourability score is +7%, giving him a 16-point lead over Poilievre.
- 4** Over 3-in-5 (61%) Canadians are afraid of Trump's renewed presidency, while 4-in-5 are concerned about the looming threat of tariffs. Both Carney and Poilievre are nearly equal as best equipped to handle Canada-US relations. Comparatively, Poilievre is viewed as better than Freeland by 8 points.
- 5** 3-in-5 Canadians did not read, see, or hear anything about the LPC's leadership debate; of those who did, 1-in-5 (21%) watched both. About 2-in-5 say Freeland performed as expected; Carney underperformed by 7 points. Nevertheless, over 1-in-4 (24%) say Carney did the best in the debate, while 23% are uncertain.

# Methodology

# Survey Methodology

**These are the results of an online survey conducted between February 26<sup>th</sup> and February 28<sup>th</sup>, 2025.**

**Method:** This online survey was conducted using INNOVATIVE's Canada 20/20 national research panel with additional respondents from Lucid, a leading provider of online samples. Each survey is administered to a series of randomly selected samples from the panel and weighted to ensure that the overall sample's composition reflects that of the actual Canadian population according to Census data to provide results that are intended to approximate a probability sample.

**Sample Size:** n=1,488 Canadian citizens, 18 years or older. The results are nationally weighted to n=1,000 based on Census data from Statistics Canada.

**Field Dates:** February 26<sup>th</sup> and February 28<sup>th</sup>, 2025.

**Weighting:** Results for Canada are weighted by age, gender, region, education, and self-reported federal past vote to ensure that the overall sample's composition reflects that of the actual population according to Census data, in order to provide results that are intended to approximate a probability sample. Weighted and unweighted frequencies are reported in the table.

**Margin of Error:** This is a representative sample. However, since the online survey was not a random probability-based sample, a margin of error cannot be calculated. Statements about margins of sampling error or population estimates do not apply to most online panels.

**Note:** Graphs may not always total 100% due to rounding values rather than any error in data. Sums are added before rounding numbers.
